

DLMI 2026 Hand's on Setup instructions

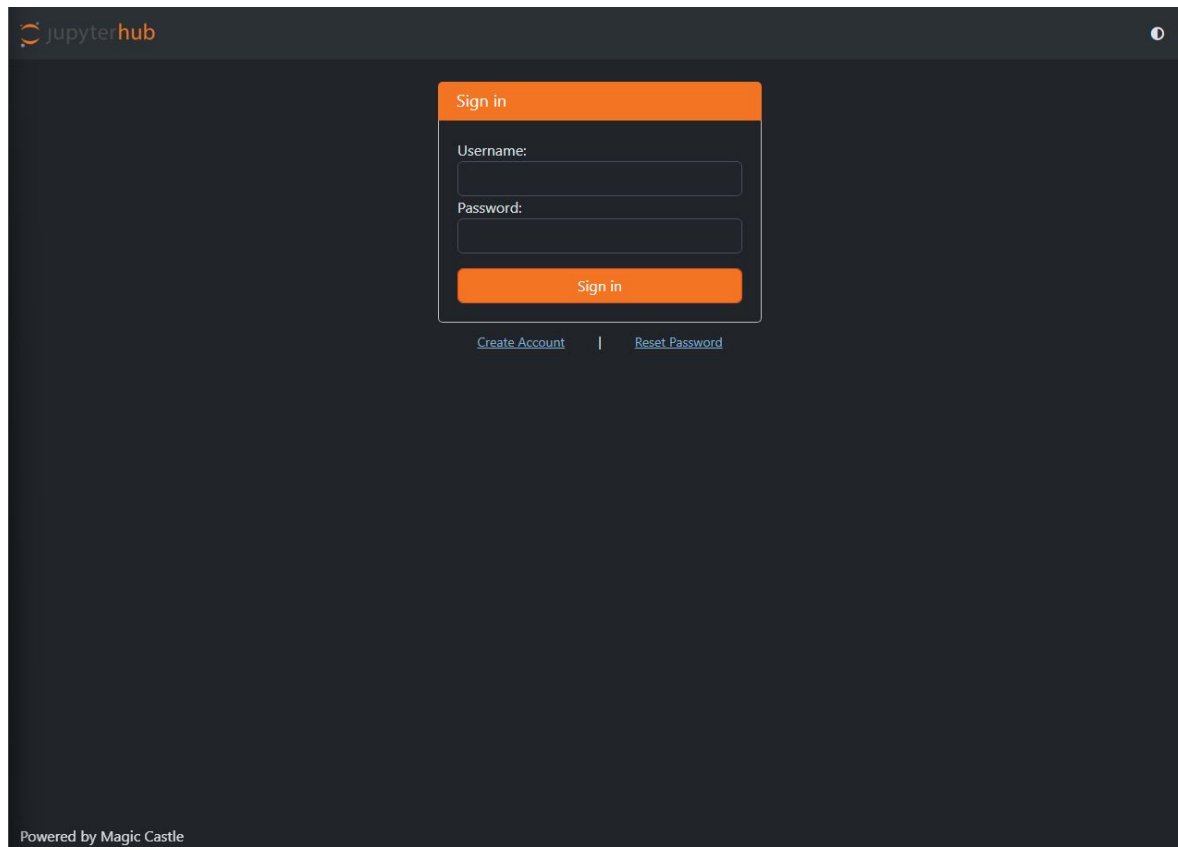

— Montreal, June 15–19 —

DLMI2026

1. Create an account

Go to: <https://jupyter.dmlti.calculquebec.cloud/hub/login?next=%2Fhub%2F>

The image shows a JupyterHub login interface. At the top left is the JupyterHub logo. In the center, there is a white box with an orange header labeled "Sign in". Below the header are two input fields: "Username:" and "Password:". Below these fields is an orange "Sign in" button. At the bottom of the white box, there are two links: "Create Account" and "Reset Password", separated by a vertical line. The background is dark gray. At the bottom left, it says "Powered by Magic Castle".

2. Login

- Go to: <https://jupyter.dmlti.calculquebec.cloud/hub/login?next=%2Fhub%2F>
- Enter your username and password

The image shows the JupyterHub login page. At the top left is the JupyterHub logo. In the center, there is a 'Sign in' form with an orange header. The form contains two input fields: 'Username:' and 'Password:'. Below these fields is an orange 'Sign in' button. At the bottom of the form, there are two links: 'Create Account' and 'Reset Password', separated by a vertical line. The footer of the page reads 'Powered by Magic Castle'.

3. Create compute node

Once logged-in

1. Set memory to 4096
2. Set GPU to 1x1G.5GB
3. Other settings should not be changed (verify with this screenshot)

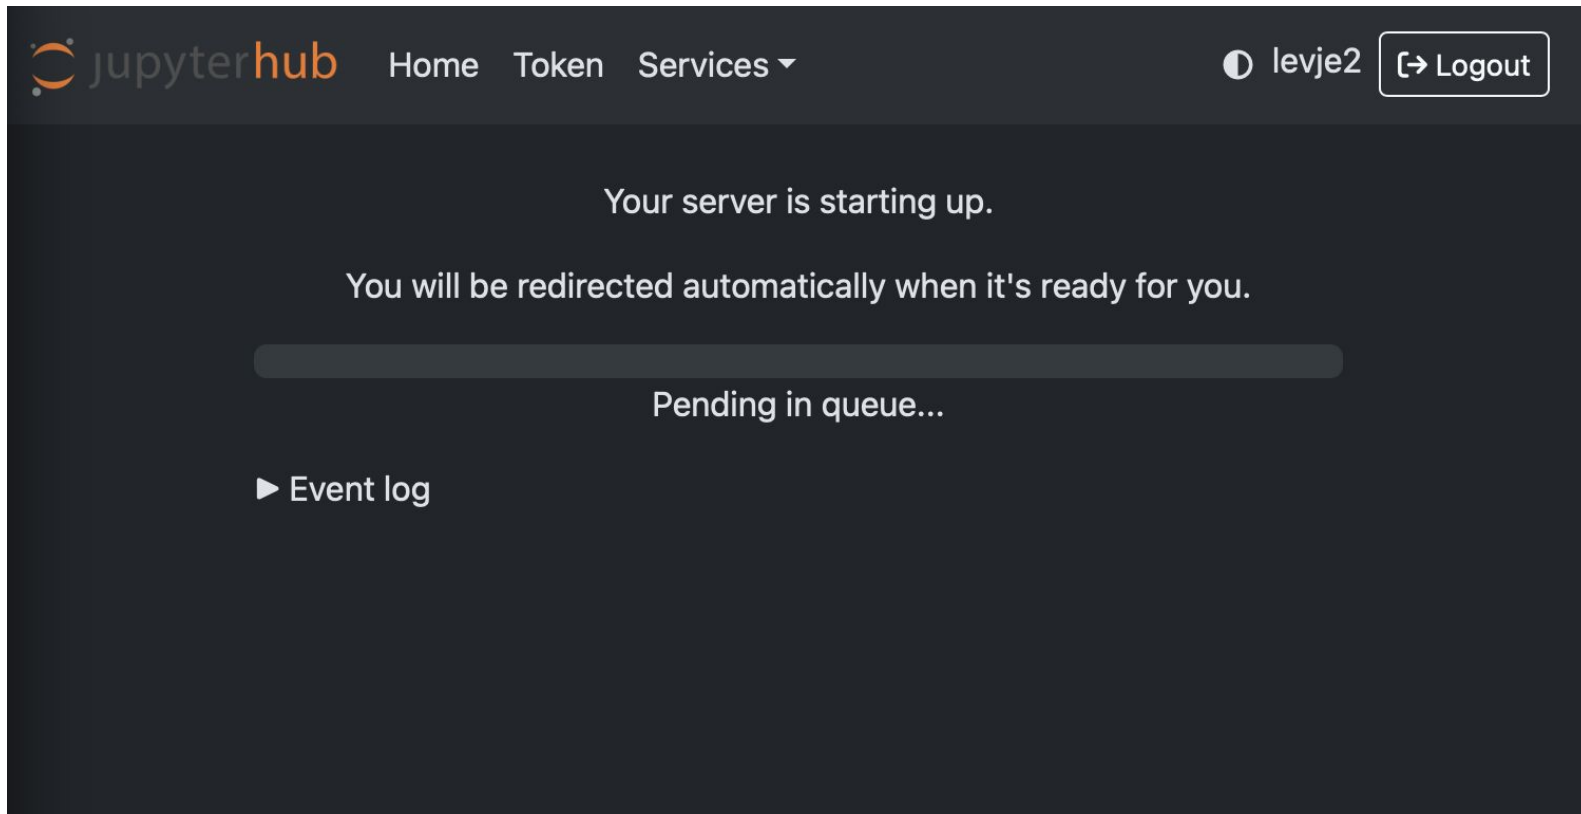

The screenshot displays the 'Server Options' configuration page. The settings are as follows:

Field	Value
Reservation	None
Account	def-sponsor00
Number of cores	1
GPU configuration	1 x 1G.5GB
User interface	JupyterLab
Partition	
Time (hours)	4.0
Memory (MB)	4096

Additional options include a checked checkbox for 'Enable core oversubscription? Recommended for interactive usage' and a large orange 'Start' button at the bottom.

3. Create compute node

- Wait for your compute to load. **This may take 4-5 minutes**

4. Jupyter Lab

You should now see the JupyterLab interface.

This interface allows to use different tools such as Jupyter Notebooks and the terminal. You can also easily upload files.

You are ready to start working!
